**Advanced Project Management: Optimizing Workflow using Freeware Solutions**

The story of the Swedish warship Vasa, built in 1628 on King Gustavus Adolphus II's orders, epitomizes the dire consequences of *poor project management*. This grand vessel, the most powerful and ornate in the Swedish navy, cost over **5% of the nation's GDP**—equivalent to \$500 billion today. Despite its magnificence, the Vasa capsized and sank less than 1400 yards into its maiden voyage. This disaster underscores the enduring relevance of effective project management, illustrating that the issues faced nearly 400 years ago still challenge us today.

Implementing new policies, creating new processes and procedures, conducting research, and other tasks that are unique and impactful to stakeholders require effective project management. Hence, we are inviting you to join *Advanced Project Management: Optimizing Workflow using Freeware Solutions - September 4 to 6, 2024 (PHP2900.00) via ZOOM (9am to 4pm daily)*:

1. Features of a project and **detail its life cycle**.
2. Explore the processes in initiating a project from identifying prioritized problems to setting project objectives.
3. Compare and contrast different project frameworks and its tradeoffs.
4. Detail the process of establishing the project schedule and identifying the critical pathway.
5. Project **participatory and communication plan**.
6. Project **monitoring, evaluation, and control** in project implementation and close out.
7. Utilize software to create the project schedule and identification of critical pathway, allocate required resources, and finalize project budget.

<b>Register Now and Deposit within the Year:</b>	<a href="https://forms.gle/N6Qhca5C7uEGGned6">https://forms.gle/N6Qhca5C7uEGGned6</a>
