The field of records management has tremendously transformed with the emergence of modern information and communication technology; from the traditional physical records keeping and retrieval to electronic creation, maintenance and use of digital format. Digitization, curation, archival preservation and e-records engagement are some of the meaningful ways that bring transformative change in terms of service enhancement. This seminar aims to provide participants with implementable solutions which will serve as tools for electronic/digital records management in organizations. It will also provide participants beyond their theoretical understanding of records management with practical approaches of technology integration in traditional records management.

In view of the above, we are cordially inviting Local Chief Executives, Department and Division Heads, Legislative Officers and Staff, Records Officers, Records Managers, Records Custodians, Data Curators, Document Controllers, Administrative Officers, Information Officers, Librarians, Secretaries, and other personnel who are involved in the records management activities of their respective offices.
